

PRIMARY TELEPHONE LINE BALLOT

John Q. Customer
123 Main Street
Anywhere, USA

- As a telecommunications customer, you can choose which telephone line or number is your primary local service line.
- You may receive local service over several lines and/or from several carriers – traditional phone carriers or wireless carriers. However, you can only designate one line as your primary line.
- Your designation of a primary line will determine which carrier is eligible to receive any federal universal subsidies that may be available as a result of providing service to you.
- You can only change primary lines once every six months, although you are not required to change.

Please fill in the phone number, including area code, of your primary line below and mail this ballot to the carrier that provides the line you have chosen as primary.

PHONE NUMBER OF YOUR PRIMARY LINE: _____

You must return this ballot by May 31, 2005. If you do not return this ballot, your primary line will be deemed to be the primary line provided by your incumbent traditional phone carrier, INCUMBENT CARRIER, INC.
